Below are some of the key features available in ArtCAM Express 2015

Prevent Machining Issues

Troublesome vectors, such as clockwise and anticlockwise vectors can easily be identified.

Create & Edit Vector Text In The 3D View

Write text then rotate, scale and angle it as well as write text on a curve live!

Added Vector Selection

Simply drag the mouse right to left & any vector partially or completely within that area is selected.

Combine & Replace Relief Segments

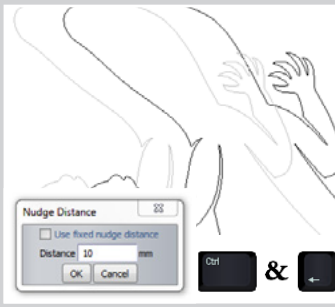

Arrange designs by overlapping reliefs using the combine replace mode.

Faster Vector Manipulation

You can now select multiple vectors and edit their nodes simultaneously in both 2D & 3D views.

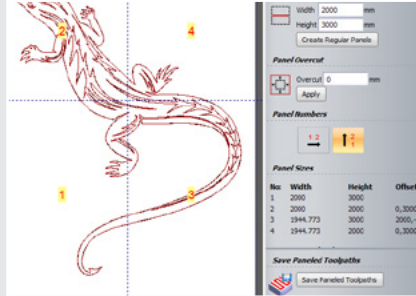

Easier Movement Of Relief Clipart & Vectors

You can now specify the distance they are nudged using ALT and the keyboard arrow keys.

New Module: Toolpath Paneling Module

Divide larger jobs to fit your machine & material for reassembly once cut.

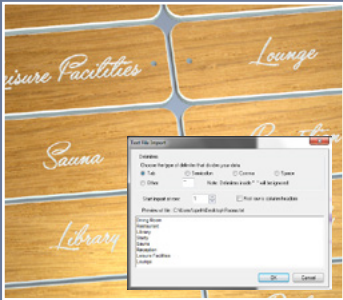

New Module: Bevel Carving Module

Create a hand-carved look or add beveled edges e.g. for frames, molds & signs.

New Module: Multi-Plate Module

Use text or CSV data files to create multiple plaques or door plates.

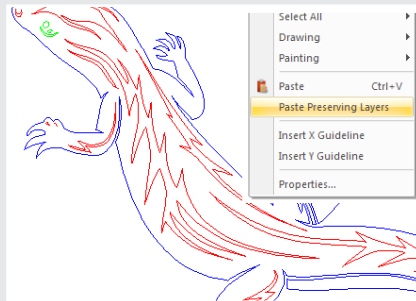

New Module: Fluting Module

Texturize surfaces using vectors and the geometry & motion of the cutting tool.

Upgraded Module: Vector Tools More Vector Pasting Options

Choose whether you want to preserve the vector layers from your selection when pasting.

Upgraded Modules: Advanced 2D Machining & Nesting Simultaneously Update Bridges

Apply amended parameters to bridges associated with a selection of vectors.

Want more functionality? New features in ArtCAM Insignia 2015 include:

- Live & interactive shape creation tools
- Turn vectors into 3D weaves
- Create rotary models
- Slice your relief model to for easier CNC, laser & 3D printing
