

# What's New in ArtCAM JewelSmith 2015

ArtCAM JewelSmith is a unique solution tailored to the jewellery industry, offering relief modelling from ArtCAM Pro together with an extensive library of jewellery components and design tools. With ArtCAM JewelSmith you can design and manufacture personalised jewellery pieces through to new complete lines.

# 2015

## ArtCAM JewelSmith

[www.artcam.com/jewelsmith](http://www.artcam.com/jewelsmith)

Below are some of the key features available in ArtCAM JewelSmith 2015

### Greater Support For CNCs, Lasers & 3D Printers

There are now more relief slicing options. These include: relief layers, relief files, SVG & PNG.

### Live & Interactive 3D Shape Creation

See 3D shapes take form instantly with the interactive 3D shape creation tools (Shape Editor, Extrude, Turn, Spin & Two Rail Sweep).

### Easily Reuse 3D Designs

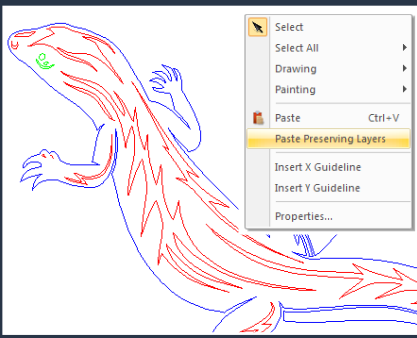

Select and send multiple pieces of floating Relief Clipart from the Project Tree to the Relief Clipart Library.

### Modelling Putty For Computers

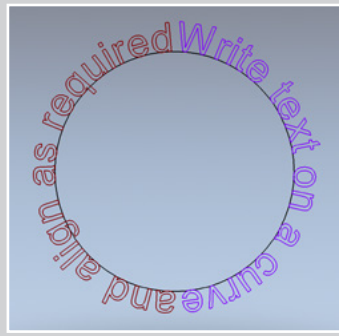

Interactively alter your model by displacing, whirling, pinching, or puckering Relief Clipart or vectors (the Putty tool).

### More Vector Pasting Options

Choose whether you want to preserve the vector layers from your selection when pasting.

### Create & Edit Vector Text In The 3D View

Write text then rotate, scale and angle it as well as write text on a curve live!

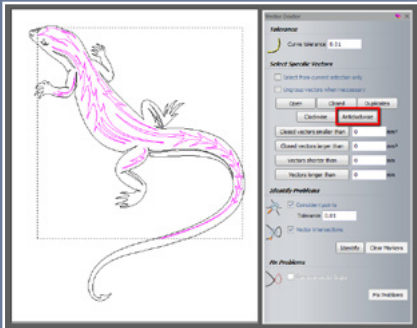

### Combine & Replace Relief Segments

Arrange multiple designs freely by overlapping reliefs in separate layers using the new combine replace mode.

### Easier Movement Of Relief Clipart & Vectors

You can now specify the distance they are nudged using the ALT and keyboard arrow keys.

### Prevent Machining Issues

Troublesome vectors, such as clockwise and anticlockwise vectors can easily be identified.

### New Rotary Model Creation

Specify your rotary model's dimensions, orientation & resolution, which you can then add your design onto.

### Add Custom Tools To A Database

Use an open vector to represent your tool's profile.

### Added Vector Selection

Simply drag the mouse right to left & any vector partially or completely within that area is selected.

### Faster Vector Manipulation

You can now select multiple vectors and edit their nodes simultaneously in both 2D & 3D views.

### Please note:

These are just a few of the new features and enhancements added to ArtCAM. For more information, why not contact your local reseller?
