

What's New in ArtCAM 2015

2015

ArtCAM's artistic CAD/CAM software range starts from as little as \$149 and comprises the entry-level version, ArtCAM Express for users new to CNC machining, ArtCAM Insignia the introductory 3D modeling package, ArtCAM Pro for more complex 2D & 3D design and manufacture, and ArtCAM JewelSmith for the jewelry industry.

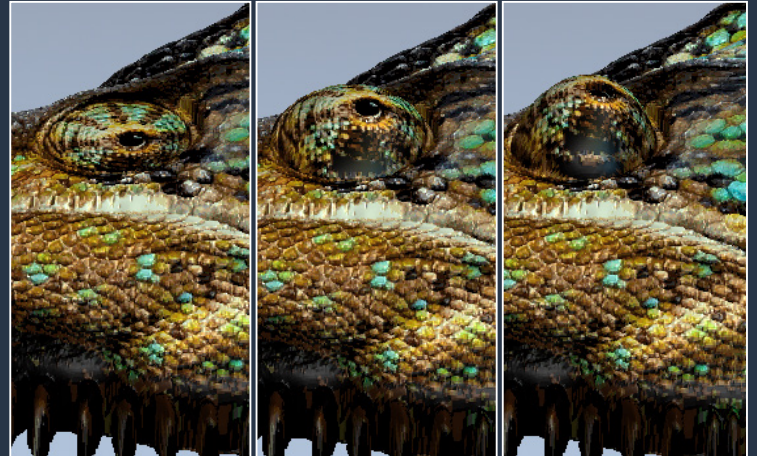

Below are some of the key features available across the range...

Modeling Putty For Computers

Interactively alter your model by displacing, whirling, pinching, or puckering selected Relief Clipart or vectors (the **Putty** tool).

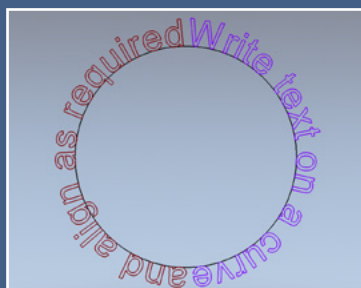

Live & Interactive 3D Shape Creation

See 3D shapes take form instantly with the interactive 3D shape creation tools (Shape Editor, Extrude, Turn, Spin & Two Rail Sweep).

Create & Edit Vector Text In The 3D View

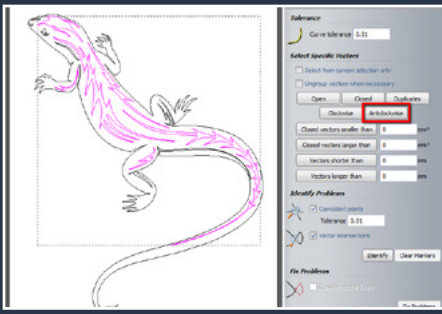

Write text then rotate, scale and angle it as well as write text on a curve live!

Combine & Replace Relief Segments

Arrange designs freely by overlapping reliefs in separate layers using the combine replace mode.

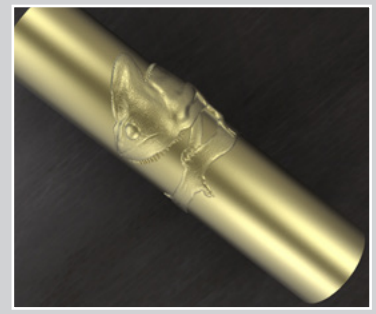

Prevent Machining Issues

Troublesome vectors, such as clockwise and anticlockwise vectors, can easily be identified.

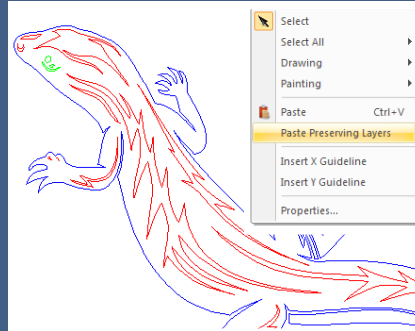

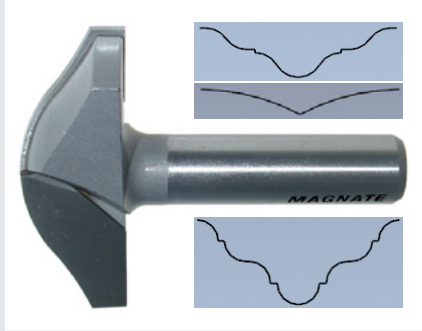

New Rotary Model Creation

Specify your rotary model's dimensions, orientation & resolution, which you can then add your design onto.

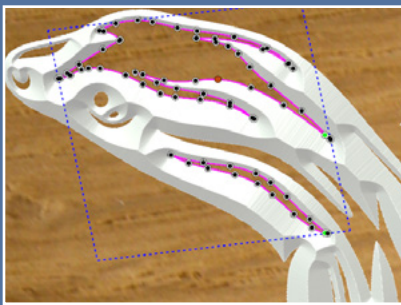

Add Custom Tools To A Database

Use an open vector to represent your tool's profile.

More Vector Pasting Options

Choose whether you want to preserve the vector layers from your selection when pasting.

Faster Vector Manipulation

You can now select multiple vectors and edit their nodes simultaneously in both 2D & 3D views.

Easier Movement Of Relief Clipart & Vectors

You can now specify the distance they are nudged using ALT and the keyboard arrow keys.

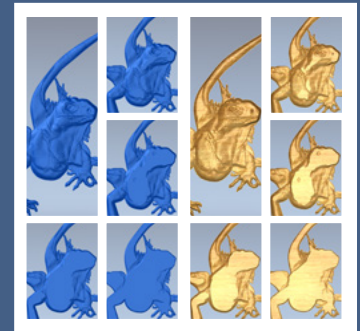

Simultaneously Update Bridges

Apply amended parameters to bridges associated with a selection of vectors.

Greater Support For CNCs, Lasers & 3D Printers

There are now more relief slicing options. These include: relief layers, relief files, SVG & PNG.

Add Functionality With Modules

New Express modules include: bevel carving, multi-plate, toolpath paneling and fluting.

Please note:

- 1) In order to purchase the new ArtCAM Express modules or upgraded modules you must also have the latest version, ArtCAM Express 2015!
- 2) These are just a few of the new features and enhancements added to ArtCAM. For more information, why not contact your local reseller.
